VIEWING VIDEOS

There are several ways to view videos from the browse or search results page.

When TITLES are displayed on the browse or search results page:
1. Click on the “Play Video” icon or on the title to view the complete video.
2. Or, click on the “View segments in this video” link to display available segments. Click on a segment from the list to access that specific segment directly.

From the VIEW VIDEO page:
1. Click on the “Segments” tab to display available segments from the selected video. Click on a segment, and playback of that segment will begin automatically.
2. Click on the “Full Title” tab, and then click on the program title. Playback will begin automatically from the beginning of the video.

Many videos support closed-captioning.
To view a video with closed-captioning:
1. Click on the closed-captioning icon, if one appears in the video player, to display the caption text once the video is playing.
2. To turn the captions off, click on the closed-captioning icon again.

It’s easy to control your video playback experience.
1. To adjust the volume, mute the audio, or pause the video, use the embedded video functions.
2. To view a video in full-screen mode, click on the icon next to the volume control.

To close full-screen mode, press the “Esc” button on your keyboard or click on the icon.

FYI

All videos are optimized for mobile-friendly video playback on the iPad, iTouch, and iPhone.

FYI

Not all of the videos include closed-captioning. If the CC icon is not displayed, there is no closed-captioning available.
